DETAILED ACTION

Claim Objections

1. Claim 6 is objected to because of the following informalities: in the last line on page 16, the word "some" should be replaced by the word "sum". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 6 – 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, paragraph b first line, "said reproduced signals" lacks antecedent basis.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
5. Claims 6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 6,741,634 to Kim et al.

Kim teaches performing disspreading (col 6 line 8), summing (col 6 lines 23+), subtracting (col 6 lines 24+) and summing (col 6 lines 24+). Kim does not explicitly

teach the use of a "channel estimation value"; however, SNR discussed in col 2 lines 8+ which undergoes further processing as discussed therein can be considered to be an obvious variation of this.

With regard to claim 10, see col 4 lines 50+ where K stages are discussed.

6. Claims 1 – 5 are allowed. Claims 7 – 9 are allowed over the current art of record, although the 112 problems remain.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Blount whose telephone number is 571 - 272 - 3071. The examiner can normally be reached on M-F 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Chau Nguyen, can be reached on 571 – 272 - 3126. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
